QUESTION 1

A reliable measure is one that is:

- A. socially valid as indicated by caregiver reports.
- B. effective as evidenced by peer-reviewed journal articles.
- C. trusted to be practical and to produce accurate data.
- D. consistent across observers and measurement occasions.

Correct Answer: D

QUESTION 2

To change the occurrence of hitting others, two procedures were compared. Differential reinforcement of incompatible behavior and time-out. The outcomes were examined within and across subjects. A withdrawal design was employed. An independent variable in this study was:

- A. aggression.
- B. frequency across phase changes.
- C. return to baseline.
- D. time-out from reinforcement.

Correct Answer: D

QUESTION 3

Data were collected on the percentage of intervals at the end of which Thomas was present at his workstation. Which is the BEST method for displaying these data?

- A. cumulative record
- B. equal-interval line graph
- C. scatterplot
- D. standard behavior (semilogarithmic) chart

Correct Answer: B

QUESTION 4

The behavior analyst has had good results with an intervention she designed that makes access to video games contingent upon playing with other children. She now wants to compare the effects of differing amounts of video game

access time. She should conduct a

- A. changing criterion study.
- B. nonparametric study.
- C. parametric study.
- D. reversal study.

Correct Answer: C

QUESTION 5

If a client exhibits problem behaviors throughout the day and evenings regardless of what is going on in the environment and what activities he/she is participating in, which would be the BEST way to reduce the high frequency and increase latency?

- A. Use a differential reinforcement procedure for the absence of problem behaviors for an amount of time with a high magnitude reinforcer as a reward.
- B. Use a high magnitude punishment procedure every time he/she exhibits the problem behavior.
- C. Use a low magnitude punishment procedure every time he/she exhibits the problem behavior.
- D. Use a fixed ratio reinforcer every time he/she exhibits appropriate behavior.

Correct Answer: A
