QUESTION 1

Your manager started a brainstorming session during a meeting on how automation can be driven in the network. He asks what tools can be used to increase automated services in the network. What would you answer be?

- A. We need to find a software company that will write software to automate the network services.
- B. We can create rule-based automation. We can also use Artificial Intelligence and Machine Learning to automate all network services.
- C. We can write scripts that will be executed at certain times when a specific event happens and the service will be automated in this way.
- D. We can use big data. It is the main tool that should be used for network automation.

Correct Answer: B

QUESTION 2

What is the primary benefit of Edge Cloud?

- A. Lower latency
- B. Higher Availability
- C. Larger Bandwidth
- D. Lower Cost

Correct Answer: A

QUESTION 4

Which one of the following requires a network service package defined in a catalog?

- A. Cloud software platform
- B. Cloud infrastructure software
- C. Cloud orchestration
- D. Software defined network

Correct Answer: C

QUESTION 5

Which of the following is not a benefit of Network Slicing?

- A. Priority between different flows
- B. Privacy and segmentation between flows
- C. Recovery of network flows when they fail
- D. Differentiated QoS flows, for different services

Correct Answer: C
