QUESTION 4

A developer has been asked to build a question and answer system using the IBM Watson Assistant service for a retail bank to handle questions from customers on the banking website. From which group of users should the developer target to collect representative questions?

- A. A sample set of members from IT team managing the website
- B. call center agents who routinely handle such customer calls
- C. executive sponsor and decision makers at the bank
- D. a sample set of end users of the application

Correct Answer: B

QUESTION 5

A journalist would like to analyze four short sentences captured and transcribed from verbal sound-bites from a political candidate. Is the IBM Watson Personality Insights service an appropriate technology to accomplish this goal?

- A. Yes, the Personality Insights services will provide details about the personality of this political candidate
- B. Yes, because the journalist will combine the Personality Insight with Speech to Text service to accomplish this goal
- C. No, there is not enough text for the Personality Insights service to analyze and provide reliable results
- D. No, the Personality Insights service provides only information about the emotional state of the candidate

Correct Answer: C
