QUESTION 1

What does a developer need to do to view the artifacts and their dependencies that are used across all toolkits in the IBM Process Center repository?

- A. Get Administrative rights.
- B. Use the Global scope option.
- C. Use the POST /bpm/repo/projects REST API.
- D. Ensure that the Process Centers are registered to each other and enabled for sharing.

Correct Answer: B

QUESTION 2

In which phase is a user end-to-end testable solution first established?

- A. Process analysis
- B. Process design and development
- C. Integration design and development
- D. User interface design and development

Correct Answer: A

QUESTION 3

How can process applications be enabled to create, update, or download ECM documents?

- A. Use an external ECM server instead of the internal IBM BPM document store.
- B. Select '\\Always use this connection information\\' properties of the ECM server definition.
- C. Use the Document List or Document Viewer coach views to create, update, or download the documents.
- D. Add the '\\enable-document-authorization-security-service\\' configuration setting to the 100Custom.xml.

Correct Answer: B

QUESTION 4

IBM BPM offers which read-only system variable to access the information stored about an exception that occurred in an instance of a service?

- A. tw.object.Error

- B. tw.system.error
- C. tw.object.XMLElement
- D. tw.system.step.error

Correct Answer: D

QUESTION 5

Which statement is true regarding IBM BPM's support of Swagger definitions for the REST APIs?

- A. There is no Swagger definition available for the REST API.
- B. The Swagger definition is only available for IBM BPM on Cloud installations.
- C. The Swagger definition is only available if the IBM BPM installation includes a web server that hosts the Swagger UL
- D. The Swagger definition is available via a REST API call or via a URL if the IBM BPM installation includes a web server that hosts the Swagger UL

Correct Answer: A
