QUESTION 1

An analyst needs to find events coming from unparsed log sources in the Log Activity tab. What is the log source type of unparsed events?

- A. SIM Generic
- B. SIM Unparsed
- C. SIM Error
- D. SIM Unknown

Correct Answer: A

Explanation:

SIM Generic log source or by using the Event is Unparsed filter.

QUESTION 2

An auditor has requested a report for all Offenses that have happened in the past month. This report generates at the end of every month but the auditor needs to have it for a meeting that is in the middle of the month.

What will happen to the scheduled report if the analyst manually generates this report?

- A. The scheduled report needs to be reconfigured.
- B. The analyst needs to delete the scheduled report and create a new one.
- C. The report will get duplicated so the analyst can then run one manually.
- D. The report still generates on the schedule initially configured.

Correct Answer: B

Explanation: Shared schedules must be deleted manually using the Schedules page in the web portal or the Shared Schedules folder in Management Studio. If you delete a shared schedule that is in use, all references to it are replaced with report-specific schedules. If you delete a shared schedule that is used by multiple reports and subscriptions, the report server will create individual schedules for each report and subscription that previously used the shared schedule. Each new individual schedule will contain the date, time, and recurrence pattern that was specified in the shared schedule. Note that Reporting Services does not provide central management of individual schedules. If you delete a shared schedule, you will now have to maintain the schedule information for each individual item.

QUESTION 3

An analyst has to perform an export of events within a timeframe, but not all the columns are present in the log view for the time period the analyst has selected. The analyst only needs specific columns exported for an external analysis.

How can the analyst accomplish this task?

- A. Edit the search and select the extra columns, then export the result with Action/Export to XML/Full Export. This export is only supported in XML.
- B. Edit the search and select the extra columns, then export the result with Action/Export to XML/Visible Columns. This export is only supported in XML.
- C. Edit the search result and select the extra columns, then export the result with Action/Export to CSV/ Full Export.
- D. Edit the search result and select the extra columns, then export the result with Action/Export to CSV/ Visible Columns.

Correct Answer: D

QUESTION 4

How many normalized timestamp field(s) does an event contain?

- A. 2
- B. 3
- C. 4
- D. 1

Correct Answer: B

Explanation:

There are 3 timestamp fields on events in Qradar.

Reference: https://www.ibm.com/mysupport/s/question/0D50z00006PEG2mCAH/why-do-i-see-different-time-stamps-for-qradar-events?language=en_US

QUESTION 5

Which QRadar component stores Offenses?

- A. Console
- B. Data Node
- C. Event Processor
- D. Event Collector

Correct Answer: B

Explanation: QRadar Data Node Data Nodes enable new and existing QRadar deployments to add storage and processing capacity on demand as required. Data Nodes help to increase the search speed in your deployment by providing more hardware resources to run search queries on.
