QUESTION 1

A customer wants to provision all storage for a particular workload, which will run on 12 individual LPARs in a Power System E980. Their Chief Information Officer is concerned that allocating all the storage to each LPAR individually will lead to lack of storage flexibility in the long term.

How can shared storage pools benefit this customer?

A. When storing data on shared storage pools, the data is automatically compressed to take less space.

B. Shared storage pools automatically move data in the background to where it is needed most.

C. All the storage will be allocated to the VIOS but can be given to LPARs as required.

D. Shared storage pools provide automatic data archiving tools that prevent over consumption of the storage.

Correct Answer: D

QUESTION 2

What is L4 cache?

A. Off-processor-chip buffering to provide faster main memory access in enterprise servers.

B. Allows for Active Memory Expansion of the main memory in enterprise servers

C. On-processor-chip buffering of GPU results

D. On-processor-chip buffering between L3 and POWER9 processor cores

Correct Answer: D

QUESTION 3

A customer is considering implementing NovaLink for critical Enterprise workloads.

Where will NovaLink run?

A. As an appliance connected to the FSP.

B. On the HMC.

C. As a job in each dual VIOS.

D. In a separate Linux partition on the managed server.

Correct Answer: D

QUESTION 4

What POWER9 processor capability has been enhanced, relative to POWER8, to enable more efficient processor utilization in support of some applications?

A. SMT8 Fused Core Optimization

B. SMT16 Simulation Mode

C. Direct Attached Memory Mode

D. AltiVec Instruction set

Correct Answer: D

QUESTION 5

Which of the following is a feature in PowerVM?

A. Simultaneous Multithreading

B. Hard capping of virtual machines

C. Active Memory Expansion

D. Storage Connectivity Groups

Correct Answer: B
