QUESTION 1

How can cloud computing make a real difference to a customer\\'s business?

A. Cloud delivers predictable monthly CAPEX charges which allow many businesses to more easily manage their IT budgets based on known costs and their changing compute demand

B. Cloud environments offer high availability by default meaning that migration to cloud will immediately solve any issues the business has had with application downtime

C. Cloud makes it possible for businesses to greatly decrease the time from decision to value by enabling the ability to experiment, learn, and fail fast, without large amounts of upfront capital

D. Cloud vendors sell annual hardware hosting contracts to tens of thousands of customers and can discount heavily due to economies of scale meaning cloud is inexpensive

Correct Answer: A

QUESTION 2

What is the definition of a monolithic application?

A. A small single purpose software application, commonly deployed in a container that interacts with other similar applications in order to form a system

B. A single-tiered software application in which the user interface and data access code are combined into a single program from a single platform

C. An application that deploys onto a proprietary software platform

D. A technical term for describing applications which have reached end-of-life due to software support expiring or new business requirements arising that result in an upgrade being required

Correct Answer: B

QUESTION 3

What describes a Public Gateway?

A. It is a service that distributes connections to VPC-hosted web sites evenly across zones

B. It provides an encrypted network tunnel between the VPC and on-premises networks for management

C. It enables communication to the internet for all virtual server instances on the attached subnet

D. It is configured through rules to allow traffic to reach the network interface of attached VSIs

Correct Answer: C

QUESTION 4

A company has decided to implement cloud computing service models (IaaS, PaaS, SaaS), and is defining the right persona to use each of them.

Who will be the typical user for IaaS?

A. Sales Engineer

B. Line of Business user

C. System Administrator

D. Developer

Correct Answer: C

QUESTION 5

Where can workloads or applications for classic infrastructure be deployed in IBM Cloud?

A. Dedicated server

B. Both virtual servers and bare metal servers

C. Virtual servers only

D. Bare metal servers only

Correct Answer: C
