### QUESTION 1

Which statement describes a Content Delivery Network?

- A. A network of servers on the internet with websites running with high speed connections
- B. A file server that is in the user geographical location closest to them to speed up transfer of data
- C. A distributed server network that delivers temporarily stored or cached copies of website content to users based on the user's geographic location
- D. A distributed server network that delivers temporarily stored or cached copies of website content to users based on the user's geographic location

Correct Answer: B

---

### QUESTION 2

What are the key tenets of a hybrid cloud?

- A. Interoperability, scalability, and portability
- B. On-demand self-service, controlled zone network access, and measured service
- C. Usable, collaborative, and extensible
- D. Logging, auditing, and network isolation

Correct Answer: A

---

### QUESTION 3

How can cloud computing make a real difference to a customer's business?

- A. Cloud delivers predictable monthly CAPEX charges which allow many businesses to more easily manage their IT budgets based on known costs and their changing compute demand
- B. Cloud environments offer high availability by default meaning that migration to cloud will immediately solve any issues the business has had with application downtime
- C. Cloud makes it possible for businesses to greatly decrease the time from decision to value by enabling the ability to experiment, learn, and fail fast, without large amounts of upfront capital
- D. Cloud vendors sell annual hardware hosting contracts to tens of thousands of customers and can discount heavily due to economies of scale meaning cloud is inexpensive

Correct Answer: A

---

### QUESTION 4

What is a smart assistant (also known as virtual assistant)?

- A. A software application that continues to learn about the user's preferences as usage grows
- B. A Cloud device that enables DevOps to build applications easier and faster
- C. A tool that helps to manage compliance to various standards
- D. A small sensor or other device that constantly send its status and other data to the cloud

Correct Answer: A

---

#### QUESTION 5

What is a challenge of Serverless Cloud Computing in low-latency financial applications?

- A. Containers may need to cold start resulting in delays
- B. Serverless containers cannot record the logs required for financial auditing
- C. Long processing transactions can have hidden direct and indirect costs
- D. Requires new security paradigms and best practices

Correct Answer: D
