QUESTION 1

How can cloud computing make a real difference to a customer's business?

- A. Cloud delivers predictable monthly CAPEX charges which allow many businesses to more easily manage their IT budgets based on known costs and their changing compute demand
- B. Cloud environments offer high availability by default meaning that migration to cloud will immediately solve any issues the business has had with application downtime
- C. Cloud makes it possible for businesses to greatly decrease the time from decision to value by enabling the ability to experiment, learn, and fail fast, without large amounts of upfront capital
- D. Cloud vendors sell annual hardware hosting contracts to tens of thousands of customers and can discount heavily due to economies of scale meaning cloud is inexpensive

Correct Answer: A

QUESTION 2

According to NIST, what are the five essential characteristics of the cloud?

- A. On-demand self-service, broad network access, resource pooling, rapid elasticity, and measured service
- B. Networks, firewalls, storage, applications, and services
- C. Platform as a service, bring your own software license, ability to reply applications over the internet, software as a service, and private network
- D. On-demand network access, dedicated pool of computing resources, direct attached storage, rapid provisioning, and self service

Correct Answer: A
