### QUESTION 1

A retailer has a requirement to group certain regular items together to form a parent item. The inventory is maintained only at the parent item level and not for the components. The parent item will be sold as an individual item, with all the components.

How should the implementation professional configure the item type to support the retailer's requirement?

- A. Logical Kit
- B. Dynamic Physical Kit
- C. Physical Kit
- D. Bundle Items

Correct Answer: C

### QUESTION 2

A business wants to make sure that when an item within an order is not available at local store or regional distribution centers, the item should be sourced from a central warehouse.

How can this be accomplished?

- A. Enable the "Fulfill from all ship nodes" configuration in the Applications Manager
- B. Ensure that the central warehouse belongs to a central region created in the Applications Manager
- C. Ensure that the central warehouse is configured in a distribution group in the Applications Manager
- D. Make use of the backorder against the highest priority ship node rule in the document-specific fulfillment rule

Correct Answer: C

### QUESTION 3

In the following scenario, the system should avoid locking in YFSJNVENTORYJTEM until the overall availability is low (150).

Item	Node	Demand	Supply
Item-1	Node1	3149	5578
Item-1	Node2	2559	2550

How can this requirement be modeled in the system?

- A. Configure yfs.hotsku.lockOnlyOnLowAvailability = Y

- B. Configure yfs.skipLockInventoryitemList = Y
- C. Configure yfs.hotsku.assumeUnavailableonLockTimeout = Y
- D. Configure yfs hotsku.useAvailabilityAcrossNodes = Y

Correct Answer: A

---

#### QUESTION 4

The Real-Time Availability Monitor (RTAM) transaction is under which process type?

- A. Applications Manager > Applications > Process Modeling > Inventory Management
- B. Applications Manager > Applications > Application Platform > Process Modeling > Order Tab > Order Fulfillment process type
- C. Applications Manager > Applications > Application Platform > Process Modeling > General Tab > General process type
- D. Applications Manager > Applications > Process Modeling > Global Inventory Visibility

Correct Answer: C

---

#### QUESTION 5

In IBM Sterling Order Management (OMS), an implementation professional needs to define the menu options that a specific user will see. How should this requirement be configured?

- A. Default menu options can be modified in the profile properties file created in the OMS installation folder
- B. Personalized menu options can be developed using pre-defined Java class files located in the /externalDeployments folder.
- C. New menu options can be configured in the Application Manager. This menu will be defined for a specific user, so it is not necessary to include this new menu in menu groups.
- D. New menu options for a specific user can be defined in the Application Manager. As with any other menus options defined in the solution, it should be included in a menu group.

Correct Answer: D
