-  **800,000+** Satisfied Customers

QUESTION 1

A non-master operator has rights to create custom content. His manager wants him to create a baseline to deploy updates to Adobe Reader and Oracle Java. How can this be done?

- A. Baselines may not be used for application updates.
- B. Right-click on the required update and select Add to New Baseline.
- C. Use the Software Deployment wizard to specify the baseline and select the updates.
- D. Use the Fixlet Debugger to compute the sha1 and size value. Manually create a baseline action script with these values.

Correct Answer: C

QUESTION 2

A Windows baseline containing 100 updates to 1000 computers was just deployed. After one day many of the targeted computers are reporting their status as Pending Restart. What does this message indicate?

- A. The system was locked when the action was deployed.
- B. The user rebooted the system while the baseline was executing.
- C. System administrators need to log in to each system and reboot it.
- D. At least one of the updates deployed in the baseline requires a reboot.

Correct Answer: A

QUESTION 3

How is a computer added to a manual group?

- A. Use the Manual Group wizard.
- B. Select the computer from the list view then right-click and select Add to Manual Group.
- C. Settings in the IBM Endpoint Manager (IEM) console that is specific for each operator.
- D. As a computer is added to the IEM environment, it will be added to a manually created group.

Correct Answer: B

QUESTION 4

A retrieved property is configured to return results for relevant endpoints once every 24 hours. The last property result for a specific endpoint was six hours ago. The configuration has changed so the next time the result is returned, it will be

different than the result from six hours ago.

When will the endpoint return an updated result?

- A. As soon as the client loop has completed.
- B. In approximately 18 hours, if the endpoint is online.
- C. There will not be a new result until the retrieved property has been deactivated and reactivated.
- D. Immediately; a change in property value will cause the endpoint to upload a new result to the server.

Correct Answer: B

QUESTION 5

A user has 10 new Windows server computers that she wants to add to the existing Windows servers manual computer group. How can she add the new servers to this group?

- A. Tools > Add Computers to Manual Computer Group
- B. select all of the new Windows Server computers, right-click, and select View as Group
- C. view the Windows Servers computer group and click the button Add Computers to Group
- D. select all of the new Windows Server computers, right-click, and select Add To Manual Group

Correct Answer: D
