QUESTION 1

Which IBM Tivoli Storage Manager (TSM) V7.1 component provides a general overview of the status of the TSM server and clients?

A. TSM Manager

B. Operations Center

C. IBM Tivoli Monitoring agent

D. Integrated Storage Console

Correct Answer: B

The Operations Center is IBM\\'s next-generation graphical user interface for Tivoli Storage Manager. It provides advanced end-to-end visibility of the entire backup environment. Over time, IBM plans to add more control and automation

capabilities, which will dramatically simplify daily management and operational tasks for a wide range of users.

Incorrect:

Not A: IBM Tivoli Storage Manager is a client and server program that provides storage management solutions to customers in a multi-vendor computer environment. IBM Tivoli Storage Manager provides an automated, centrally scheduled,

policy-managed backup, archive, and space-management facility for file servers and workstations. Not D: No such thing as an Integrated Storage Console.

QUESTION 2

What is the result when the migrate process moves data from a deduplicated pool to a non- deduplicated pool?

A. The migration process fails.

B. The target pool is marked as deduplicated.

C. The data is reconstituted on the target pool.

D. The data in both storage pools is reconstituted.

Correct Answer: B

* Data deduplication in Tivoli Storage Manager is a two-phase process. In the first phase, the server identifies the duplicate data in the storage pool. As volumes in the storage pool are filled, data becomes eligible for duplicate identification. A volume does not have to be full before duplicate identification starts. In the second phase, duplicate data is removed by any of the following processes:

Reclaiming volumes in the primary-storage pool, copy-storage pool, or active-data pool Backing up a primary-storage pool to a copy-storage pool that is also set up for deduplication Copying active data in the primary-storage pool to an active-data pool that is also set up for deduplication Migrating data from the primary-storage pool to another primary-storage pool that is also set up for deduplication Moving data from the primary-storage pool to a different primary-

storage pool that is also set up for deduplication, moving data within the same copy-storage pool, or moving data within the same active-data pool

QUESTION 3

What is meant by the archive option, RETVER=365?

A. Retain archive data for 365 days.

B. Retain 365 archive versions of this file.

C. Retain 365 backup versions of this file.

D. Migrate the file back to the customer\\'s server after 365 days.

Correct Answer: A

You can control the period for which migration copies are stored in Tivoli Storage Manager storage. If you accept the installed-default data management policy, migration copies can be deleted from Tivoli Storage Manager storage in one year.

RETVer determines the number of days to retain a migration copy. When the retention period specified by RETVer ends, the Tivoli Storage Manager server marks the file for deletion.
