### QUESTION 1

A company is installing Maximo and will be configuring WebSphere on a remote server. They are able to login to the WebSphere console from the installing workstation, but installation fails with an error that the WebSphere server cannot be reached.

What could be a possible cause of the error?

- A. Remote access has not been enabled on the server running WebSphere.
- B. The server running WebSphere does not have a fully-qualified domain name.
- C. The server running WebSphere is on a different network subnet than the installing workstation.
- D. The installing workstation is running a different operating system than the server running WebSphere.

Correct Answer: A

---

### QUESTION 2

An administrator has been tasked to create a suite of new Work Order Key Performance Indicators (KPIs). The KPIs are very similar with the exception of different variables including site, priority, and work type.

Which application can streamline the creation and maintenance of these new KPIs?

- A. KPI Viewer
- B. KPI Manager
- C. KPI Templates
- D. Report Manager

Correct Answer: D

---
