QUESTION 1

What are three components provided by an Infrastructure as a Service provider?

- A. storage
- B. network
- C. compute
- D. database
- E. applications
- F. object storage

Correct Answer: BDF

QUESTION 2

What greatly affects the speed of cloning VMware templates?

- A. speed of disk
- B. type of network card
- C. format of the VM image
- D. architecture of the video card

Correct Answer: C

QUESTION 3

What kind of strategy is the best approach based on the IBM Cloud Computing Reference Architecture V4 to minimize the risks in cloud computing?

- A. Implement cloud native services that are inherently security aware.
- B. Enable strong authentication of cloud users to make it less likely that unauthorized users can access the cloud.
- C. Implement tools for monitoring, logging, and controlling access to or distribution of sensitive organizational data.
- D. Define a cloud strategy with security in mind, identify the security measures needed, and enable security for the cloud

Correct Answer: C

QUESTION 4

The term Recovery Point Objective refers to which statement?

- A. The point in time to which data must be recovered after a disaster.
- B. The objective of business continuity to restore critical operations after a disaster
- C. The duration of time within which a business process must be restored after a disaster.
- D. It describes the applications and locations for which data has to be restored after a disaster

Correct Answer: C

QUESTION 5

What is a typical grid computing usage scenario?

- A. Users get root access to remote instances and install and deploy their own applications configuring the environment for executing MPI applications.
- B. Users run applications on a computing infrastructure comprised by a collection of homogeneous nodes that share I/O facilities, operating system processes, and appear as single system.
- C. Developers build applications that require a large number of computing resources beyond the size of the local department computing facilities and submit the application for execution to internet scale computing infrastructures.
- D. Developers have a limited amount of investments for running their web applications and decide to leverage Computing as a Service solutions to increase their investments in computer resources as their applications become more popular.

Correct Answer: B
