QUESTION 1

What are the benefits for an organization utilizing dynamic infrastructure for running its workloads?

- A. Organizations no longer need their own data centers which reduces the cost of their own IT expenditure.
- B. Dynamic infrastructure provides the means to achieve elastic scalability which ensures that organizations keep constant and predictable costs for the IT resources utilization.
- C. By leveraging pooled IT resources, dynamic infrastructure provides flexible IT capacity which better aligns the allocation of IT resources to business process needs of the organization
- D. Dynamic infrastructure is essential for the implementation of application service catalogs which reduces the time to market of such applications and increases the organization's business revenue.

Correct Answer: C

QUESTION 2

The term Recovery Point Objective refers to which statement?
