- A. Banyan Vines
- B. File Transfer Protocol (FTP)
- C. AppleTalk address resolution protocol (AARP)
- D. Transmission Control Protocol/Internet Protocol (TCP/IP)

Correct Answer: D

QUESTION 4

Richard needs to deploy the widget catalog to all of his employees and is using an IBM Domino policy to assist in doing

so.

What setting will set the server name and will not allow his employees to make changes?

- A. Set catalog and limit changes.
- B. Set URL and disallow changes.
- C. Set value and prevent changes.
- D. Set configuration and negate changes.

Correct Answer: A

QUESTION 5

Renovations Inc. has two IBM Sametime Community Servers configured in a clustered environment.

Why are the users being re-directed to the primary Sametime Community Server only?

- A. The secondary node is running with a lower fixpack level than the primary node.
- B. The Sametime administrator has stopped the secondary node to apply a recommended fixpack.
- C. The LTPA key on the secondary node that is being shared between the Sametime Community servers is corrupt.
- D. The Sametime administrator has given users the load balancer IP address instead of the secondary node IP address.

Correct Answer: C
