### QUESTION 1

Arthur needs to clean up cached user data from an object cache in IBM WebSphere Portal after the user's session is ended.

Which areas are valid to place Arthur's cleanup logic? (Choose two.)

- A. Implicit Login Filter Chain
- B. Explicit Login Filter Chain
- C. Implicit Logout Filter Chain
- D. Explicit Logout Filter Chain
- E. Session Validation Filter Chain

Correct Answer: BE

---

### QUESTION 2

Kevin created a new theme using the non-WebDAV approach. He installed and registered the theme and then applied it to a managed page. After reviewing his theme, he noticed he was not getting his custom footer elements. What action should he take first?

- A. Check WebDAV and make sure the theme folder exists there.
- B. Make changes to the rel=dynamic- content entry to point to the right content spot.
- C. Make changes to the XMLAccess script to re-register the theme in IBM WebSphere Portal.
- D. Delete the Project in the IBM WebSphere Integrated Solutions Console and install a new theme project.

Correct Answer: D

Procedure Export the worklight\_extension.ear from the WebSphere?Integrated Solutions Console. Click Applications > Application Types > WebSphere enterprise applications. Click Next until you find the worklight\_extension application. Select worklight\_extension and click Export on the toolbar. Click the worklight\_extension.ear link to download and save the EAR file to your file system.

---

### QUESTION 3

James is developing a portlet and wants to share the cache entry across all users upon certain conditions.

What is a valid way to accomplish his goal?

- A. Add the conditions in the doView method and set the cache scope to public in the request.
- B. Add the conditions in the doview method and set the cache scope to public in the response.
- C. Add the conditions in the doHeade rs method and set the cache scope to public in the request.

D. Add the conditions in the doHeaders method and set the cache scope to public in the response.

Correct Answer: D

---

#### QUESTION 4

Which statement is true regarding the relative width of the wpthemeCol2of 5 CSS class?

- A. It cannot be used in a custom layout.
- B. It is a semantic type relative-width class.
- C. It is a CSS class for a column that takes two-fifths of the width of the page.
- D. It is a CSS class for the second column on a page that consists of five columns.

Correct Answer: A

---

#### QUESTION 5

Which statement is true regarding JSR 286 event support in IBM WebSphere Portal?

- A. Events can be wired to IBM API cooperative portlets.
- B. Events can be wired to JSR 168 cooperative portlets.
- C. Events cannot be used in tandem with public render parameters.
- D. When the "Global" check box is set on the wires page. JSR 286 event processing is automatic; wires are not needed and, therefore, are ignored.

Correct Answer: B

Interoperability between JSR 286 portlet events and JSR 168 cooperative portlets By concept, cooperative portlets are similar to JSR 286 portlet events. Both concepts describe publish/subscribe communication patterns that are based on typed information that is published and received by portlets and propagated via communication links.

Because the concepts are quite similar, the portal supports data exchange between JSR 168 cooperative portlets and JSR 286 portlets that support events. This means that you can extend an existing setup using JSR 168 cooperative portlets with new JSR 286 portlets and that you can smoothly migrate individual cooperative portlets to the new API without losing communication possibilities.
