### QUESTION 1

An application developer is working on IBM WebSphere Commerce V7 FEP 7. and uses CATENTRY.FIELD1 to store the loyalty points associated with the products. The developer needs to display the loyalty points associated with each product on the product display page in the storefront.

Which three of the following search components need to be modified to achieve this?

- A. wc-data-config.xml
- B. we-rest-resourceconfig.xml
- C. schema.xml
- D. wc-component.xml
- E. element in wc-search.xml and add field1 index
- F. element in wc-search.xml and add field1 index

Correct Answer: BDE

---

### QUESTION 2

Which of the following statements about installing IBM WebSphere Commerce Developer V7.0 is true?

- A. Ensure that any locale-related environment variables on the system are set to any one of the following: pt\_BR. en\_US. fr\_FR. de\_DE, itJT, ja\_JP, ko\_KR, pl\_PL, ro\_RO, ru\_RU, zh\_CN. es\_ES, zh\_TW, en\_GB
- B. The system can run on any of the following Operating Systems: Windows. AIX, Solaris, Linux. IBM i Series, HP-UX
- C. The system can run any of the following database servers: DB2, Oracle, Apache Derby
- D. The system must have a pre-configured web server

Correct Answer: C

---

### QUESTION 3

The default side-by-side integration configuration of IBM WebSphere Commerce and IBM Sterling Order Management supplies a manual adjustment apply policy, FixedReplacement to the getOrderPrice API. A customer service

representative can make a single adjustment against an order for each of the three adjustment types: LineAdjustment, OrderAdjustment. orShipmentAdjustment.

To support the receipt of more than one order, line, or shipment manual adjustment, the application developer has to perform a customization.

Which customization is applicable for a Order Level adjustment in IBM WebSphere Commerce?

- A. Insert into CALMETHOD values (-199, -1, -7)  
Update CALRANGE set CALMETHOD\_ID = -199  
Update CALRLOOKUP set value=0 where CALRLOOKUP\_ID=-12;
- B. Update the Struts extension file to include the following:  

```
<task name="commandInvoker">  
  <param name="invoked_commandClassName"  
value="com.ibm.commerce.order.commands.FixedreplacementCmd"/>  
  <param name="getOrderprice" value="/Manual" />  
</task>
```
- C. Update CALRANGE set CALMETHOD\_ID=-13 where CALRANGE\_ID=-11;  
Update CALRLOOKUP set value=0 where CALRLOOKUP\_ID=-11;
- D. Configure the property in the wc-admin-component.xml file to include the following:  

```
<_config:property name="Order_FixedReplacement" value="Y"/>
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Correct Answer: B

#### QUESTION 4

What restrictions must the application developer keep in mind when building the command- based invalidation policies in cachespec.xml?

- A. The only methods that can be used in the method component, are those invoked by the command that returns the input instance variables
- B. All the cache IDs must match either the dependency IDs or component IDs
- C. All the invalidation IDs must match either the dependency IDs or component IDs
- D. The request attributes component type must be used

Correct Answer: B

## QUESTION 5

To support the "buy one get one free" functionality, when a consumer adds an item to the shopping cart, another applicable item should be added automatically. The customer has an external service that they intend to use to determine the applicable item.

How can this feature be implemented and made available via REST Service in IBM WebSphere Commerce V7 FEP 7, with minimum customization?

- A. Extend OrderItemAddCmd/OrderCalculateCmd to call the external service. The extension will automatically be invoked when the CartHandler service is used.
- B. "Buy one get one free" is a supported type of promotion, it can be created and managed using the Promotions tool in IBM Management Center for WebSphere Commerce. The feature is available in the out of the box CartHandler service.
- C. Implement a ResourceHandler which invokes a custom entity bean. The custom entity bean calls external service and updates the PX\_PROMOTION table. OrderItemAddCmd will automatically process the table and add the free item accordingly.
- D. Extend the out of the box OrderHandler, which invokes processOrChangeOrder() in OrderHelper: update ChangeOrderSOIBODMapping.xml configuration with custom implementation of OrderItemAddCmd/OrderCalculateCmd to call external service and add the free item accordingly.

Correct Answer: C
