QUESTION 1

A FileNet system administrator is configuring a new Fixed Storage Device for their IBM FileNet P8 Domain. What is the order of steps to create storage related items needed to complete this task?

A. Fixed Content Device, Staging Area, Storage Area.

B. Storage Area, Staging Area, Fixed Storage Device.

C. Fixed Content Device, Storage Area, Replication Group.

D. Fixed Content Device, Replication Group, Working Area.

Correct Answer: C

QUESTION 2

A business partner is preparing to deploy multiple IBM FileNet Content Platform Engine (CPE) instances on the same system by using the Configuration Manager command line.

What xml file would the business partner need to generate and which command would the business partner use to run the xml file to deploy the CPE application on the web server?

A. deployapplication.xml; configmgr_cl run –task DeployApplication –profile myprofile

B. deployapplication.xml; configmgr_cl execute –task DeployApplication –profile myprofile

C. deploymentapplication.xml; configmgr_cl deploy –task DeployApplication –profile myprofile

D. deploymentapplication.xml; configmgr_cl exe –task DeploymentApplication –profile myprofile

Correct Answer: C

QUESTION 3

What URL structure is needed to connect to a non-HA FCM object store via EJB?

A. t3://FCM_hostname:port_number/FileNet/Engine

B. iiop://FCM_hostname:port_number/FileNet/Engine

C. htpp://FCM_hostname:port_number/wsi/FNCEWS40SOAP/wsdl

D. htpp://FCM_hostname:port_number/wsi/FNCEWS40MTOM/wsdl

Correct Answer: A

QUESTION 4

A software vendor is implementing the IBM Content Management Interoperability Services (CMIS) for IBM FileNet Content Manager.

The administrator will set which two of the following for this configuration?

A. IBM CMIS supports only Federated Repositories.

B. IBM CMIS and FileNet Content Engine can have the same LDAP server.

C. The IBM FileNet P8 and IBM CMIS Platform uses LDAP-based security and also supports Java 2 security.

D. Use the IBM WebSphere Application Server administrative console for the Content Engine server to ensure that the following settings match on both (CMIS and P8 Content Engine) application servers. 1) User filter 2) Group Filter 3) User ID map 4) Group member ID map 5) Certificate map mode 6) Certificate filter

E. Use the IBM WebSphere Application Server administrative console for the Content Engine server to ensure that only the following settings match on both CMIS and FileNet Content Engine application servers.

1) Primary administrative user name.

2) Automatically generated server identity.

Correct Answer: D

QUESTION 5

A large government agency will be upgrading and migrating from IBM FileNet P8 V5.1x to P8 V5.2.1 with a Microsoft SQL database. P8 V5.2.1 will be installed in a new environment.

Which of the following operating system accounts will need to be created in the new P8 V5.2.1 environment?

A. The Content Platform Engine installer account (cpe_install_user), Content Platform Engine operating system user (cpe_os_user) and the Configuration Manager user (config_mgr_user).

B. The Content Platform Engine application server installation administrator (cpe_appserver_install_user), Content Platform Engine installer account (cpe_install_user) and the Configuration Manager user (config_mgr_user).

C. The Content Platform Engine application server installation administrator (cpe_appserver_install_user), Content Platform Engine installer account (cpe_install_user), Content Platform Engine operating system user (cpe_os_user) and the Configuration Manager user (config_mgr_user).

D. The Content Platform Engine application server installation administrator (cpe_appserver_install_user), Content Platform Engine installer account (cpe_install_user), Content Platform Engine operating system user (cpe_os_user), Database User account (p8_db_user) and the Configuration Manager user (config_mgr_user).

Correct Answer: C
