### QUESTION 1

A table is in Third Normal Form if it is already in Second Normal Form, plus:

- A. All attributes are determined only by the primary key
- B. All attributes are determined by all segments of the primary key
- C. All foreign keys are determined by the primary key
- D. All surrogate keys are determined by the primary key

Correct Answer: A

---

### QUESTION 2

Which of the following describes the models contained in the '\24 Ways\' book referenced in the BI Professional Workshop course?

- A. Framework Manager models that map over an example normalized database, which one might find in a manufacturing enterprise.
- B. Physical, star schema data models for constructing data marts for the various departments in a generic business enterprise.
- C. Logical models that contain dimensions and key tactical metrics for the various departments in a generic business enterprise.
- D. Cognos 8 OLAP Modeler (Transformer) models that describe how to map data from a manufacturing database into a PowerCube.

Correct Answer: C

---

### QUESTION 3

You are tasked with administering the Cognos BI system to perform batch reporting in a way that maximizes the use of available system resources. Given the following information, how many jobs should be created to perform this task?

480 reports must run

6 report processes are available

Each process is configured to use 4 low affinity connections

- A. 20
- B. 24
- C. 48
- D. 12

Correct Answer: A

---

#### QUESTION 4

Which of the following is a critical component in delivering Corporate Performance Management throughout an enterprise?

- A. Drill down from summary to detailed information within individual subject areas.
- B. Drill across from one subject area to another through conformed dimensions.
- C. Star schema data marts designed to facilitate analysis and reporting.
- D. Event management designed to monitor the status of Key Performance Indicators.

Correct Answer: B

---

#### QUESTION 5

A developer has specified a maximum of two report processes for the application. While monitoring the application, the developer notices that only one report process is running.

Which of the following would account for this?

- A. The number of affinity connections per BI Bus is set too high.
- B. The configuration size for the application is set too low.
- C. The number of low affinity connections has been exceeded.
- D. The number of report requests is too high.

Correct Answer: A
