QUESTION 1

A company wishes to coordinate the anticipated hiring activities of all of the departments in a given division of the organization. The CEO has mandated a limit of 50 total new hires for the coming fiscal year. The various departments must coordinate future hiring. The CEO would also like to see reports comparing the projected hiring vs. the actual number of new hires by department.

Which set of Cognos 8 components BEST supports the company's needs?

- A. Planning and Report Studio
- B. Report Studio and Analysis Studio
- C. Event Studio and Report Studio
- D. Planning and Data Manager

Correct Answer: A

QUESTION 2

When deploying an application from a development environment to a production environment, which of the following is correct when each environment uses a separate LDAP instance?

- A. There are no issues because the Access Control List (ACL) references the same usernames.
- B. Use the Cognos BI security objects.
- C. Do not use Cognos BI security unless you are deploying your application using Series 7 Cognos Access Manager for authentication.
- D. There are no issues because LDAP objects are always replicated between the environments.

Correct Answer: B

QUESTION 3

When following the Information Focused approach, what should the users bring to the initial interview?

- A. Copies of key reports, structure of database tables, job responsibilities, and objectives
- B. Job responsibilities, objectives, what information they need to get their work done, and copies of key reports
- C. List of reports they desire, what information they need to get their work done, and structure of database tables
- D. Job responsibilities, objectives, and a list of reports they desire

Correct Answer: B

QUESTION 4

Which of the following statements is true about the Waterfall Approach?

- A. The five steps in the process are considered valid for BI software development projects.
- B. Each step is performed in sequence but you return to previous steps at specific points in the development cycle.
- C. It is designed so that requirements that are not discovered in the Analysis step will cascade out during the design phase.
- D. Project management tools no longer encourage the Waterfall Approach.

Correct Answer: A

QUESTION 5

Which of the following describes the design goals of a reporting database?

- A. provide fast access to corporate data for analysis and reporting
- B. provide near real time access to summarized corporate data for analysis and reporting
- C. provide fast access to corporate data and act as a system of record
- D. provide near real time access to summarized transactional data

Correct Answer: A
