QUESTION 1

Which of the following is a valid strategy for addressing failover for the content store?

- A. Install active and passive instances of the content store.
- B. Install active and passive instances of the Content Manager service.
- C. Take advantage of failover protection in the Applications tier by installing the content store on a server that hosts multiple instances of the report service.
- D. Take advantage of database backup and failover strategies and policies already in place in the environment.

Correct Answer: D

QUESTION 2

The V-Model testing process specifies that developers should both verify and validate each test.

Which of the following describes how developers would validate their tests in the design step of the V-model?

- A. Check the design by conducting an assembly test.
- B. Check the design by conducting a component test.
- C. Check the design against the business requirements.
- D. Check the design against the developed components.

Correct Answer: C

QUESTION 3

A user makes the following request: "I need to see actual sales compared with projected sales, and margin range for branches within each division, by product line, sales rep by sales manager, and cost center over time." Based on the user's request, Actual Sales and Projected Sales have been identified as required measures.

Which of the following other measures would be included in an initial dimension map?

- A. Unit Cost
- B. Average Sales
- C. Discount Amount
- D. Sales Variance

Correct Answer: D

QUESTION 4

Which of the following describes the models contained in the '24 Ways' book referenced in the BI Professional Workshop course?

- A. Framework Manager models that map over an example normalized database, which one might find in a manufacturing enterprise.
- B. Physical, star schema data models for constructing data marts for the various departments in a generic business enterprise.
- C. Logical models that contain dimensions and key tactical metrics for the various departments in a generic business enterprise.
- D. Cognos 8 OLAP Modeler (Transformer) models that describe how to map data from a manufacturing database into a PowerCube.

Correct Answer: C

QUESTION 5

Which of the following requires additional configuration for installing Cognos BI in a development and production environment?

- A. The application in the development environment and in the production environment will use the Tomcat servlet container as the application server.
- B. The development environment will include workstations hosting Framework Manager and Cognos 8 OLAP Modeling, while the production environment will not.
- C. The environment contains customized port and firewall settings for the default http and application server port.
- D. The development and production environment will use data sources that are in Unicode.

Correct Answer: C
