#### QUESTION 1

Installation and setup of IBM Tivoli Endpoint Manager (TEM) Client Manager for Endpoint Protection (CMEP) involves which two steps? (Choose two.)

- A. CMEP Site Subscription
- B. importing the CMEP Masthead
- C. activating CMEP tasks and analyses
- D. installing the CMEP Module on the TEM Server
- E. downloading the CMEP Masthead from the IBM Support site

Correct Answer: AC

---

#### QUESTION 2

Why would a customer want to put a Relay in a DMZ?

- A. To provide Internet-based management functionality without the need for a VPN.
- B. To relay Remote Desktop or Tivoli Remote Control connections from within the corporate firewall out to mobile users computers.
- C. To setup an entry point to manage the stream of content from IBM's content servers so that new Fixlets can be downloaded onto the server.
- D. For customers who have purchased the Trend CPM module, network traffic can be captured to improve the quality of Trend Micro's Web Reputation metrics.

Correct Answer: A

---

#### QUESTION 3

What function does the setting BESClient\_Register\_Affiliation\_SseekList perform?

- A. It provides agents the list of relays they should affiliate with.
- B. It provides a relay with the list of agents it is allowed to affiliate with.
- C. It provides agents, relays, and servers the list of relays to affiliate with.
- D. It provides agents with the location on the server that stores the seek list.

Correct Answer: A

---

#### QUESTION 4

An IBM Tivoli Endpoint Manager (TEM) Agent has been notified that there is new content available. What must the TEM Agent do next?

- A. Establish a connection to the parent TEM Relay and download a new masthead.
- B. Establish a connection to the parent TEM Relay and collect only the differences from the previous gather.
- C. The parent TEM Relay establishes a connection to the TEM Agent and pushes the new content to the TEM Agent.
- D. Establish a connection to the parent TEM Relay and collect either the full site or differences from the previous gather.

Correct Answer: D

---

#### QUESTION 5

On a Linux IBM Tivoli Endpoint Manager Agent, what is the purpose of the file `/etc/opt/BESClient/actionsite.afxm`?

- A. It stores the list of sites that the agent is subscribed to.
- B. It contains the masthead information for the deployment.
- C. It stores the list of actions that have been sent to the agent.
- D. It contains the list of operators that can perform actions on that agent.

Correct Answer: B
