QUESTION 1

A company has just deployed IBM Tivoli Endpoint Manager V8.1(TEM) to manage 5000 Windows desktops for patching, operating system deployment, remote control, and power management. A patch administrator is responsible for patching all systems throughout the environment, has a TEM Console on the system, and is able to log in using the credentials supplied by the TEM administrator.An intern is hired to patch a TEM group called Test Machines. The intern has no other rights in the TEM Console. What permissions must be granted to the intern?

A. Assign operator rights to the TEM Console and management rights to the Test Machines group.

B. Assign operator rights to the TEM Console and reader permissions to the Patches for Windows site.

C. Assign master operator rights to the TEM Console and management rights to the Test Machines group.

D. Assign operator rights to the TEM Console, reader permissions to the Patches for Windows site, and management rights to the Test Machines group.

Correct Answer: D

QUESTION 2

The agent service on the endpoint is running, but an agent appears grayed out in the IBM Tivoli Endpoint Manager Console once or twice a day. What might cause this?

A. port 52311 is blocked by a firewall

B. the agent does not have a default relay

C. agent polling is set at too long an interval

D. ICMP pings are not allowed on the network

Correct Answer: C

QUESTION 3

What is the IBM Tivoli Endpoint Manager (TEM) license authorization file based upon?

A. The number of endpoints running a TEM Agent.

B. The value contained in the configuration file tem.cfg.

C. The number of TEM Servers serving all TEM endpoints.

D. The number of endpoints reported after the first full hardware scan.

Correct Answer: A

QUESTION 4
