QUESTION 1

Which statement accurately describes one of the requirements for running the Client Deployment Tool for Windows?

A. The target should have port 52311 open.

B. The target must be in an Active Directory domain.

C. The target must have file and print sharing services enabled.

D. The deployment system should be any UNIX or Windows relay.

Correct Answer: C

QUESTION 2

When logging in to the IBM Tivoli Endpoint Manager (TEM) Console these domains are visible: All Content, BigFix Management, Patch Management, Systems Lifecycle. When the Patch Management domain is opened the section for Microsoft Windows under OS Vendors is visible. Displaying non-relevant content shows many available patches but none are relevant to this environment even though there are some patches that must be deployed. Why?

A. Master operator access is required.

B. The TEM Server is not connected to the Internet.

C. No computers have been subscribed to the Patches for Windows site.

D. Authorization as a Reader for the Patches for Windows site is required.

Correct Answer: C

QUESTION 3

Why would a customer want to put a Relay in a DMZ?

A. To provide Internet-based management functionality without the need for a VPN.

B. To relay Remote Desktop or Tivoli Remote Control connections from within the corporate firewall out to mobile users computers.

C. To setup an entry point to manage the stream of content from IBM\\'s content servers so that new Fixlets can be downloaded onto the server.

D. For customers who have purchased the Trend CPM module, network traffic can be captured to improve the quality of Trend Micro\\'s Web Reputation metrics.

Correct Answer: A

QUESTION 4

What is the major consumer of network bandwidth by IBM Tivoli Endpoint Manager V8.1 (TEM) for Lifecyle Management?

A. The updates to each subscribed site for each TEM Agent.

B. The heartbeat packets sent by a TEM Agent to the TEM Server.

C. The downloading of files for patching or software installations on the TEM Agent.

D. The use of ICMP pings by the TEM Agent when Automatic Relay Selection is enabled.

Correct Answer: C

QUESTION 5

Which fields are required to create a user in IBM Tivoli Endpoint Manager Web Reports?

A. Full Name, E-mail Address, Password, Role

B. Full Name, User Logon Name, Password, Role

C. User Logon Name, E-mail Address, Password, Role

D. Full Name, User Logon Name, Password, Department

Correct Answer: B
