QUESTION 1

An author creates a report in Report Studio. The report contains a parameter for the Product line query item. The author wants to let users drill through to this report from a variety of reports created using the GO Data Warehouse (query) package. To ensure that this target report contains data for the appropriate products, the author wants to limit the report cells that users can drill through from in source reports. What must the author do when creating the drill-through defniton?

- A. Set the Product line query item as the target of the drill-through defniton.
- B. Set the Product line query item as the scope of the drill-through defniton.
- C. Add a parameter for the Product line query to the drill-through defniton.
- D. Delete all data items except for the Product line query item from the drill-through defniton.

Correct Answer: B
