QUESTION 1

To be able to access and modify any object within the portal, regardless of any security policies set for the object, the administrator must be a member of which built-in role?

- A. Server Administrators
- B. Report Administrators
- C. System Administrators
- D. Directory Administrators

Correct Answer: C

QUESTION 2

What can an administrator create to ensure that multiple users do not have to enter database credentials when they run reports?

- A. Signon
- B. Single signon
- C. Collation sequence
- D. Connection sequence

Correct Answer: A

QUESTION 3

How must the gateway component be configured when there are multiple report servers in a distributed installation to ensure failover?

- A. The gateway must be configured to know the location of the content store.
- B. The gateway must be configured to know the location of a single dispatcher.
- C. The gateway must be configured to know the location of multiple dispatchers.
- D. The gateway must be configured to know the location of the content manager.

Correct Answer: C

QUESTION 4

When installing and configuring a standby Content Manager, what must the administrator do to ensure failover?

- A. Configure the content store to know the location of all standby Content Managers.
- B. Install the first standby Content Manager on the machine with the highest processor speed.
- C. Ensure that services are started on the machines hosting the standby Content Managers before they are started on the machine hosting the default active Content Manager.
- D. Configure authentication providers the same way on all machines hosting Content Managers.

Correct Answer: D

QUESTION 5

An administrator creates a shortcut that points to an invoice report. What happens if the invoice report is renamed?

- A. The shortcut contains the original name and can be used to view the latest output before the report was renamed.
- B. The shortcut contains the original name and no longer works because the link to the report is broken.
- C. IBM Cognos Connection automatically updates the report name in the shortcut, and the shortcut remains fully functional.
- D. IBM Cognos Connection automatically deletes the shortcut.

Correct Answer: B
