### QUESTION 1

An administrator has a new standalone Guardium appliance that will be placed into production next week. The appliance will monitor traffic from a number of databases with a high volume of traffic. The administrator needs to configure the schedule to ensure the appliance internal database does not get full with incoming data.

Which data management function does the administrator need to configure?

- A. Purge
- B. Data Export
- C. Data Restore
- D. System Backup

Correct Answer: A

---

### QUESTION 2

A Guardium administrator needs to upgrade BUNDLE-STAP on a Linux server to the latest version using GIM. What parameter should the administrator set to ensure the upgrade will not require a reboot of the server?

- A. `KTAP_ENABLED=1`
- B. `KTAP_NO_ROLLBACK=1`
- C. `KTAP_LIVE_UPDATE=Y`
- D. `KTAP_ALLOW_MODULE_COMBOS=Y`

Correct Answer: C

---

### QUESTION 3

The last Vulnerability Assessment tests performed in a company were run one year ago. The company wants to ensure the Vulnerability Assessment tests keep up with the latest database common vulnerabilities. The company wants to use the Guardium default tests instead of customer designed tests. What should the Guardium administrator do to update the tests that will be run?

- A. install the latest patch on the Guardium appliance.
- B. Install the latest released Database Activity Monitor Content.
- C. Ask the database administrators to provide the default tests.
- D. Ask the Company Security Provider to supply the default tests

Correct Answer: B

---

#### QUESTION 4

A Guardium administrator installed an S-TAP but is not seeing any data in reports on the collector. The administrator discovered that an Inspection Engine is not configured for that S-TAP.

What is an Inspection Engine?

- A. A piece of software residing on the Collectors.
- B. Another software to be installed on the Database server.
- C. The same thing as the policy and it runs on the S-TAP to inspect the traffic in real-time.
- D. A set of parameters needed for the S-TAP to define how to monitor traffic for a particular database instance on a server.

Correct Answer: C

---

#### QUESTION 5

A Guardium administrator handles a large environment and has been asked to restore old data for auditors to review. This old data needs to be restored so that it does not impact the current data being collected or any merge settings. In order to keep the reports separate (old data vs current data), the administrator sets up an Investigation Center.

Which is a key requirement for users of the Investigation Center?

- A. The user must be in one of the groups INV\_1, INV\_2, or INV\_3 (case-sensitive).
- B. The users must login as one of the predefined user accounts INV\_1, INV\_2, or INV\_3 (case-sensitive).
- C. A separate user must be used with a role of either INV\_1, INV\_2, or INV\_3 (case-sensitive).
- D. To correctly configure an investigation user, the user's Last Name must be set to the name of one of the three investigation databases, INV\_1, INV\_2, or INV\_3 (case-sensitive).

Correct Answer: D
