### QUESTION 1

A Guardium administrator is setting up a Collector schedule to export data to an Aggregator and Archive its data to an Archive storage unit for additional data safety.

Given this scenario, which is true regarding the purge schedule?

- A. The Archive and the Export have independent purge schedules but should not be run at the same time.
- B. The Guardium unit would run the Export and Archive before any purge, so you would only see the last purge run each day.
- C. it would not be possible to configure both on a Collector, the Aggregator should do the archiving and only export from the Collector.
- D. Any time that Data Export and Data Archive are both configured, the purge age must be greater than both the ageat which to export and the ageat which to archive.

Correct Answer: D

---

### QUESTION 2

A company has recently acquired Guardium software entitlement to help meet their upcoming PCI-DSS audit requirements. The company is entitled to Standard Guardium DAM offering.
