QUESTION 1

A Guardium administrator is using the Classification, Entitlement and Vulnerability assessment features of the product. Which of the following are correct with regards to these features? (Select two.)

- A. Vulnerability Assessment reports are populated to the Guardium appliance via S-TAP.
- B. Classification for databases and files use the same mechanisms and patterns to search for sensitive data.
- C. Entitlement reports are predefined database privilege reports and are populated to the Guardium appliance via S-TAP.
- D. Vulnerability Assessment identifies and helps correct security vulnerabilities and threats in the database infrastructures.
- E. The classification feature discovers sensitive assets including credit card numbers or national card numbers from various data sources.

Correct Answer: DE

QUESTION 2

An administrator previously had an issue with a Guardium system. This was resolved with the assistance from the IBM Guardium support team, who provided the shell script, a CLI command and the encrypted key to execute the uploaded shell script.

Which CLI command should the administrator use to review the commands that were previously run?

- A. fjieserver
- B. support execute showlog
- C. show log external state
- D. support must_gather system_db_info

Correct Answer: B

QUESTION 3

A Guardium administrator manages portal user synchronization by using a Central Manager.

When a change is made on the Central Manager such as, for example, adding a Guardium user to a Guardium group, how long should be allowed for the update to be synced with the managed units in a fully working environment?

- A. 0minutes
- B. 15 minutes
- C. 30 minutes

D. 60 minutes

Correct Answer: D

QUESTION 4

A Guardium administrator observes certain changes to the configuration and policies. How would the administrator identify the changes that were made and who made them?

- A. Review the Audit Process Log report.
- B. Review the sniffer buffer usage report.
- C. Review the /var/log/messages log file.
- D. Review the results of '\\Detailed Guardium User Activity\\' report.

Correct Answer: D

QUESTION 5

A Guardium administrator needs to install and configure a physical appliance to ensure network redundancy. Which port should the administrator use to configure IP teaming (bonding)?

- A. eth1 only
- B. eth2 only
- C. eth3 only
- D. any port

Correct Answer: D
