QUESTION 1

The customer directory environment includes two Active Directory (AD) Domain Controllers (DC) managing separate suffixes (one for corporate users, one for field offices), and one occurrence of Oracle Directory Server (ODS). The business requirement states the AD for corporate users in optional and the environment should remain available even if this DC is down. There are no duplicate users across these directories.

After configuring all directories in the Secure Web Settings -> Runtime Component -> Manage -> Federated Directories, how can this requirement be achieved?

A. Edit the resulting ldap.conf and add the "ignore-if-down = yes" to the AD for the corporate.

B. Ensure the "Required" checkbox is checked for both the field office AD and the ODS server.

C. Edit the resulting ldap.conf and add the "max-server-connections = 0" to the AD for the corporate.

D. Edit the resulting ldap.conf and add the "ignore-if-down = yes" to the AD for the field offices and ODS server.

Correct Answer: A

QUESTION 2

A customer deployment consists of a large number of virtual host functions definitions. During a troubleshooting session the deployment professional realizes the WebSEAL logs do not distinguish between requests to different virtual hosts.

How can this be remediated?

A. Customize the message log to include the relative URL

B. Customize the request log to include the relative URL

C. Customize the message log to include the absolute URL

D. Customize the request log to include the absolute URL

Correct Answer: D

QUESTION 3

Which Hypervisor is supported for a Virtual Appliance?

A. Hyper-V

B. ESXi 5.0

C. VirtualBox

D. VMware Workstation

Correct Answer: B

QUESTION 4

An IBM Security Access Manager (ISAM) V9.0 deployment professional wants to implement some changes to the ISAM object space in the production environment. Before applying the changes, the ISAM object space needs to be exported and saved.

How should the ISAM deployment professional do this export?

A. Use the REST API

B. Use the LMI export panel

C. Use the pdadmin command

D. Use the Policy Administration (WPM)

Correct Answer: D

QUESTION 5

An IBM Security Manager V9.0 deployment professional responsible for a large cluster notices the clocks among the nodes are not in sync and needs to update settings to ensure the clocks are synchronized.

Which setting should be used to help keep times synchronized?

A. Set NTP settings in /etc/ntp.conf

B. Set NTP settings in the components conf file

C. Set NTP settings using the LMI at the Date/Time panel

D. Set NTP settings using the LMI at he Advanced Tunings panel

Correct Answer: A
