QUESTION 1

The IBM Security Access Manager V9.0 high-volume database stores data for which component?

- A. Cluster
- B. Runtime Server
- C. Advanced Access Control
- D. Distributed Session Cache

Correct Answer: B

QUESTION 2

An Access Manager environment utilizing failover cookies was recently upgraded from TAM 6.1.1 to IBM Security Access MANAGER (ISAM) V9.0. The deployment professional wants to take advantage of the Distributed Session Cache.

What are two advantages of the DSC verses failover cookies? (Choose two.)

- A. Utilizes SHA2 encryption keys
- B. Central administration of sessions
- C. Concurrent session policy enforcement
- D. Additional session cookie increasing security
- E. Extra attributes passed in the session cookie

Correct Answer: BC

QUESTION 3

A deployment professional has created an Access Control Policy to protect sensitive business information, but is not obtaining the desired result.

Rules (4) ? Precedence: First ? Attributes: Optional

1. If **riskScore < 40**
Then Permit

2. If **riskScore < 40**
userConsent is present and
userConsent = "true"
Then Permit with Obligation **Register Device**

3. If **riskScore < 40**
userConsent is missing
Then Permit with Authentication **Consent Register Device**

4. Deny

Add Rule

Considering the rule precedence, which decision is returned for a user with a risk score of 40 and an ipAddress not considered malware?

- A. Deny
- B. Permit
- C. Deny after Authentication One-Time-Password
- D. Permit after Authentication One-Time-Password

Correct Answer: A

QUESTION 4

A deployment professional has created a new SAML 2.0 Service Provider federation and added an Identity Provider partner.

What will be the next step to allow users to single sign-on to the service?

- A. Configure trigger URL
- B. Upload a mapping rule
- C. Import Identity Provider metadata
- D. Create a certificate to sign SAML messages

Correct Answer: D

QUESTION 5

The deployment professional wants to back up the embedded LDAP personal certificate, including the private key. They navigate to Manage System Settings -> SSL Certificates -> and select the "extract" option.

Which file format is the resulting certificate backup?

- A. .p12
- B. .kdb
- C. .jks
- D. .cer

Correct Answer: A
