QUESTION 1

A deployment professional has a requirement to configure an OpenID provider which does not expose tokens to the end user.

Which grant type should be enabled when creating the federation?

- A. SAML
- B. Explicit
- C. Refresh Token
- D. Authorization Code

Correct Answer: D

QUESTION 2

An IBM Security Access Manager V9.0 deployment professional wants to be alerted by the appliance for events like certificate expiry.

In which two ways can these alert notifications be configured? (Choose two.)

- A. SNMP
- B. SMS text
- C. RSS Feed
- D. Desktop Alert
- E. Remote Syslog

Correct Answer: AE

QUESTION 3

An IBM Security Access Manager (ISAM) V9.0 environment is defined with multiple WebSEAL servers defined for high availability. They protect the same set of backend junctions.

Which parameter needs to be configured in each WebSEAL's configuration file to force all replicated WebSEAL servers to perform authorization checks against the same protected object space?

- A. host-name
- B. server-name
- C. domain-name
- D. virtual-host-name

Correct Answer: B

QUESTION 4

An Access Manager environment utilizing failover coolies was recently upgraded from TAM 6.1.1 to IBM Security Access MANAGER (ISAM) V9.0. The deployment professional wants to take advantage of the Distributed Session Cache.

What are two advantages of the DSC verses failover coolies? (Choose two.)

- A. Utilizes SHA2 encryption keys
- B. Central administration of sessions
- C. Concurrent session policy enforcement
- D. Additional session cookie increasing security
- E. Extra attributes passed in the session cookie

Correct Answer: BC

QUESTION 5

A company is planning to deploy an IBM Security Access Manager (ISAM) V9.0 cluster to provide high availability services to its customer. ISAM cluster members are separated by a firewall.

Which port(s) should be open in the firewall to assure normal cluster service functionality?

- A. 21
- B. 22
- C. 2020
- D. 2020 to 2050

Correct Answer: B
