QUESTION 1

A web application has a configured session timeout of eight hours and a default LTPA token timeout of two hours. After every two hours, the users have to log in again from their HTTP browser. The system administrator is required to make

configuration changes so users only have to log in once, while keeping the above-mentioned timeouts the same.

The authentication mechanism available is Kerberos.

How should the administrator do this?

A. Configure the SIP digest authentication.

B. Configure the SPNEGO Web or SPNEGO TAI.

C. Enable Session Management Security Integration.

D. Ensure Web Inbound security attribute propagation is enabled.

Correct Answer: C

QUESTION 2

A system administrator needs to deploy a new enterprise application which requires that application security be enabled, but, the existing applications in the cell cannot be executed with application security enabled. The cell has the global security and Java 2 security disabled.

How can the administrator handle this requirement?

A. Enable Java 2 security for the cell. Create a security domain with application security enabled. Associate the security domain to the new application.

B. Enable Java 2 security for the cell. Create a security domain with application security enabled. Associate the security domain to a new cluster to be used to deploy the new application,

C. Enable administrative security for the cell. Create a security domain with application security enabled. Associate the security domain at the application level for the new application.

D. Enable administrative security for the cell. Create a security domain with application security enabled. Associate the security domain to the new cluster where the new application is deployed.

Correct Answer: C

QUESTION 3

A system administrator is required to create a star topology for multi-cell performance management for three WebSphere Application Server cells. How should the administrator configure the Application Placement Controller (APC) in a star topology?

Configure the cell custom property Center Cell to:

A. false in all three WebSphere Application Server cells.

B. false in one WebSphere Application Server cell True in the other two WebSphere Application Server cells.

C. true in all three WebSphere Application Server cells.

D. true in one WebSphere Application Server cell false in the other two WebSphere Application Server cells.

Correct Answer: D

QUESTION 4

An application contains a web services client and the application is deployed and running. A system administrator has to add a response timeout to the deployed web services client, so the call fails in a timely fashion. Which artifact should the administrator use?

A. web.xml

B. was-webservices-sca.xml

C. ibm-webservices-bnd.xmi

D. ibm-webservicesclient-bnd.xmi

Correct Answer: C

QUESTION 5

A system administrator has started a Liberty profile server using the default values. Later, the administrator modified the server.xml file for the server to include

The administrator placed the application ServletApp.war in the apps directory under S{ server.config.dir}. While accessing the correct URL for the home page of the application, the error "Context Root Not Found" occurs in the browser.

How can the administrator resolve this error?

A. Restart the Liberty profile server.

B. Install the ServletApp.war file using the Integrated Solutions Console (ISC).

C. Place the ServletApp.war file in the directory named dropins under S {server.config.dir}.

D. Place the ServletApp.war file in the directory named applications under S{server.config.dir}.

Correct Answer: D
