QUESTION 1

A customer's data center was constructed 15 years ago. Since then its growth has exceeded expectations and necessitated the deployment of a large number of servers, storage subsystems, and switches. The energy company is currently providing the maximum amount of electricity to the data center.

What should the IBM Technical Specialist do to enable the customer's continued ability to expand its computer and storage growth?

- A. Perform a consolidation study in order to reduce the energy used by the equipment in the data center.
- B. Determine how energy allocated to IT resources is used to produce business results.
- C. Help to relocate the existing equipment to a larger data center with increased capacity from the electric company.
- D. Replace the existing equipment with Energy Star compliant equipment to reduce energy requirements.

Correct Answer: A

QUESTION 2

Which IBM storage offering enables the analytics engine with MicroLatency to more rapidly process data for insight?

- A. IBM Spectrum Scale
- B. Flexible Storage
- C. Real-time Compression
- D. IBM FlashSystem

Correct Answer: B

QUESTION 3

Which type of business continuity does a customer provide who makes nightly flash copies at the primary data center?

- A. Disaster Recovery
- B. Continuous data protection
- C. Backup Strategy
- D. Global Mirror

Correct Answer: C

QUESTION 4

What should a storage specialist do to verify that a heterogeneous solution is supported by IBM?

- A. Verify the solution using IBM Red Books
- B. Check Systems Storage Interoperation Center
- C. Consult the installation guide
- D. Perform a proof-of-concept

Correct Answer: D

QUESTION 5

A manager is evaluating XIV as a new storage solution because of an extensive utilization of snapshots in the production environment. The storage administration team is a mobile workforce and the manager is concerned about running out of snapshot capacity before an administrator can respond.

How can the solution architect respond to the manager's concern?

- A. Demonstrate the ability of the XIV to automatically convert LUNs to thin-provisioned within a storage pool to free up space for snapshots.
- B. Show how the storage administrator can remotely increase the size of the available snapshot space in a pool by using the mobile dashboard.
- C. Provide details on IBM Custom Technical Support, which automatically includes remote administration of an XIV system.
- D. Explain how custom alerting can be configured in the GUI and push notifications can be sent from IBM support to an Apple or Google service.

Correct Answer: D
