QUESTION 1

What happens to a process when a new version of a used plugin is uploaded into an instance of IBM UrbanCode Deploy?

- A. Nothing happens because the process continues to use the versions of steps that were defined in the previous version of the plugin.
- B. IBM UrbanCode Deploy provides a message that the process might be impacted by new step versions which are available in the new plugin version.
- C. The process steps automatically are updated to use the versions that are provided in the new plugin version.
- D. In current versions of the tool, the processes unfortunately become broken and must be manually repaired.

Correct Answer: C

QUESTION 2

In addition to application and environment property types, which IBM UrbanCode Deploy (UCD) property types can be referenced in UCD processes?

- A. Resource, component and system properties
- B. Report, resource, and snapshot properties
- C. Component and resource template properties
- D. Component and snapshot properties

Correct Answer: A

Property types include: component, resource, system

QUESTION 3

Which security types are used to secure the IBM UrbanCode Deploy server?

- A. Server Configuration and Web UI
- B. Security UI and Application Security
- C. Application Security and DevOps Security
- D. UI Security and DevOps Security

Correct Answer: A

QUESTION 4

Where must the Hudson/Jenkins plugin for IBM UrbanCode Deploy (UCD) be installed?

- A. The plugin must be installed into IBM UCD only.
- B. The plugin must be installed into Hudson/Jenkins only.
- C. The plugin must be installed into both Hudson/Jenkins and IBM UCD.
- D. No installation is required because the plug in is built into IBM UCD.

Correct Answer: B

UrbanCode Deploy offers a plug-in for Jenkins CI which enables you to publish the build result to UrbanCode Deploy and trigger an application process.

Install the Jenkins plug-in shipped with UrbanCode Deploy.

1.

Open the website of your Jenkins server

2.
Click on Manage Jenkins
 3.
Click on Manage Plugins
 4.
Open the Advanced tab
 5.
Click on Browse In the section Upload Plugin
 6.
Select ibm-ucdeploy-publisher.hpi. Click Upload
 7.
Restart your Jenkins server in order to see the new plug-in by using `http://jenkins-server:8080/ safeRestart`
 8.
Verify that the plug-in is installed and enabled

QUESTION 5

How do you orchestrate deployments to target environments?

- A. You use multiple component deployment processes, one for each environment. An application process defines which component process should be executed for a specific environment.
- B. You use a switch steps on each deployment process. The switch defines what resource should be used in a determined environment.
- C. You define an application. The application maps resources to environments. The same component process can be executed on all environments.
- D. You create a selector on the deployment process. The selector chooses the correct resources and agents, based on the environment.

Correct Answer: C

Specify where components are deployed by adding a resource or resource group to the environment.

Then, map the components to those resources.

Note:

Resources and resource groups identify the agents that do the work of deploying components, and provide

other configuration information. You must identify the resources for the environment and then specify which components run on which resources.
