### QUESTION 1

Several printers were moved from one IP subnet to another overnight. The printers are accessed by their Fully Qualified Domain Name (FQDN). The FQDNs were changed to resolve to the new addresses the following morning, but the IBM i will still not print to the new printers. The printers can be pinged by their IP addresses.

What is the cause of this problem?

- A. The DNS server was not restarted to present the new addresses.
- B. The network route to the new subnet is missing.
- C. IBM i has cached the resolved IP address before the change.
- D. CHGDEVPRT was not run on each device to get the new address

Correct Answer: C

---
