#### QUESTION 1

A user variable is a convenient way to:

- A. group together a set of attributes.
- B. build a complex expression using raw SQL.
- C. share a derived expression with other users for use in other flowcharts.
- D. substitute a value into an expression or query so that it's not hard-coded.

Correct Answer: D

---

#### QUESTION 2

A customer has the following requirements in a Unica deployment: they require an authentication against their corporate network and a backup logon solution in case the network is down. Which setup should be implemented?

- A. Use Windows Integrated Login.
- B. Use Unica Platform authentication.
- C. Use a LDAP authentication solution.
- D. Use a Single Sign-On (SSO) solution.

Correct Answer: C

---

#### QUESTION 3

A user wants to map a new table into a flowchart which only has one base table. This new table does not have a common field with the base table. What is the easiest way to map this new table into the flowchart?

- A. Have the database administrator add a column to the new table which is common to the base table.
- B. Have the database administrator create a view which is an amalgamation of the base table and the new table.
- C. Map the new table in at a new audience and then use the audience process in a flowchart to switch to the correct audience key.
- D. Map this new table as a dimension table to another dimension table (already mapped to the base table), that share a common field.

Correct Answer: D

---

#### QUESTION 4

Which security mechanism allows an administrator to associate Unica Campaign users with Windows users, so that

Campaign processes invoked by a user run under the credentials of the corresponding Windows user?

- A. Single Sign-On
- B. Alternate Login
- C. Security Policies
- D. Windows Impersonation

Correct Answer: D

---

#### QUESTION 5

Many flowcharts are finishing with errors but the user cannot see any activity leading up to the error in the flowchart log as logging is set too low. What can be recommended to capture more logging in all future flowchart runs?

- A. Use the unica\_svradm "loglevel HIGH" command.
- B. Have the user change the logging levels in every flowchart they run: the changes will persist.
- C. Change the logging levels in the campaign\_log4j.properties file and restart the web application server.
- D. Change the levels in the following configuration settings: Settings > Configuration --> Unica > Campaign > partitions > partition[n] > server > logging.

Correct Answer: D
