-  **800,000+** Satisfied Customers

QUESTION 1

There are NAS files that need long term archival retention of some but not all files. Which two actions will resolve this in IBM Tivoli Storage Manager V7.1?

- A. Use a CIFS or NFS to mount the NAS volumes.
- B. Use the Backup-Archive client with the archive function.
- C. Use the NDMP backup function with the archive function.
- D. Use the Backup-Archive client with the SNAPDIFF-option.
- E. Use the SnapMirror to Tape function to protect the NAS volumes.

Correct Answer: CD

Explanation: C: File-level backup and restore for NDMP operations When you do a backup via NDMP (network data management protocol), you can specify that the Tivoli Storage Manager server collect and store file-level information in a table of contents (TOC).

If you specify this option at the time of backup, you can later display the table of contents of the backup image. Through the backup-archive Web client, you can select individual files or directories to restore directly from the backup images generated.

D: Snapdiff

Using the snapdiff option with the incremental command streamlines the incremental backup process. The command runs an incremental backup of the files that were reported as changed by NetApp instead of scanning all of the volume for changed files

Incorrect:

Not E: SNAPMirror

Specifies that the file system should be copied to a Tivoli Storage Manager storage pool using the NetApp SnapMirror to Tape function. SnapMirror images are block level full backup images of a file system.

QUESTION 2

Which two tasks belong to the daily server maintenance procedure?

- A. register node
- B. activate policy
- C. expire inventory
- D. back up database

E. identify duplicates

Correct Answer: CD

Explanation: Daily schedule of Tivoli Storage Manager operations The image shows the timeline for the daily schedule: Client backups run from approximately 10 PM to 6 AM. Storage pool backup runs from approximately 6 AM to 10 AM. Database backup and the creation of disaster recovery copies of the volume history and device configuration files runs from 10 AM to 12 PM. Migration runs from approximately 12 PM to 2 PM. Expiration runs from 2 PM to 4 PM. Reclamation runs from 4 PM to 8 PM. Disaster recovery preparations run from 8 PM to 10 PM.

QUESTION 3

What is the purpose of the command Query Actlog search=...?

- A. It starts a backup using the console.
- B. It searches for the active log directory.
- C. It lists administrators with search capability.
- D. It finds an entry in the activity log by entering text.

Correct Answer: B

Explanation: Example: Task

Search the activity log for any message that contains the string "delete". The output includes only messages produced during the past hour.

Command query actlog search=delete

QUESTION 4

The IBM Tivoli Storage Manager V7.1 backup/restore client is supported on which three operating systems?

- A. AIX
- B. IRIX
- C. zOS
- D. Linux
- E. iSeries
- F. Windows

Correct Answer: ADF

QUESTION 5

What does the message ANR***W format indicate?

- A. This is a client warning message.
- B. This is an informational message.
- C. This message was posted Wednesday.
- D. This is a Tivoli Storage Manager server warning message

Correct Answer: D

Explanation: Server ANR messages list. Examples:

ANR0107W: Source file(line number): Transaction transaction ID was not committed due to an internal error.

ANR0115W: The server script script name attempted to start more parallel commands than are allowed for a single script. A single script is limited to parallel command limit parallel commands.

ANR0116W: The server script script name attempted to start more parallel commands than are allowed for the server. The server is limited to parallel command limit parallel commands.
