QUESTION 1

A scheduled incremental backup is performed on a daily basis, but when a restore is performed the file is not there. What might be the cause?

- A. The file was not included with an include statement.
- B. The node was replicated to another site but never backed up.
- C. The file is being excluded from backup because of an exclude statement.
- D. The node did not backup because the file was prefixed by an include.archive statement.

Correct Answer: A

QUESTION 2

A Tivoli Storage Manager (TSM) server has been configured so it can share access to another servers SCSI tape library and drives. Which three steps must be completed before tape sharing will operate properly?

- A. The library client's tape library definition must include LI BTYPE=SCSI.
- B. The server functioning as library client must be configured for SSL communications.
- C. Scratch tapes must be checked in on the library manager for use by the library client.
- D. Each server must be successfully defined to the other using a define server command.
- E. The library manager's tape library definition must be updated to have the SHARED=YES option.
- F. Drive path definitions must be created on the library manager to allow access by the library client.

Correct Answer: ACE

QUESTION 3

What is the purpose of the option session initialization serveronly?

- A. It speeds up the scheduled sessions.
- B. It prevents hackers from accessing the server.
