QUESTION 1

Which statement is true regarding the location of deduplication statistics information?

- A. QUERY ACTLOG shows the amount of space saved by server side deduplication.
- B. QUERY ACTLOG shows the total data reduction ratio.
- C. QUERY STGPOOL shows the total data reduction ratio.
- D. QUERY STGPOOL shows the total number of deduplicated files.

Correct Answer: C

QUERY STGPOOL (Query storage pools)

Use this command to display information about one or more storage pools.

The " QUERY STGPOOL" server command may not show the correct inline dedup and compression statistics for directory-container storage pools, erroneously reporting all these values as zero (percentage) like in the following example:

Storage Pool Name: DIRCONTPOOL

Storage Pool Type: Primary

Storage Type: DIRECTORY

.....

Deduplication Savings: 0 (0%)

Compression Savings: 0 (0%)

Total Space Saved: 0 (0%)

Incorrect Answers:

A, B: QUERY ACTLOG (Query the activity log)

Use this command to display messages generated by the server and client. This command provides filtering options that can be used to limit the number of messages displayed and the time that it takes to process this query. If you do not specify any parameters with this command, all messages generated in the previous hour are displayed.

QUESTION 2

Which two components are selectable on the IBM Spectrum Protect server installation? (Choose two.)

- A. IBM Spectrum Protect for SAN
- B. IBM Spectrum Protect client agent
- C. IBM Global Security Kit (GSKit)
- D. IBM DB2
- E. Licenses

Correct Answer: AE

By using the IBM Spectrum Protect installation software, you can install the following components:

1.
Server
2.
server languages
3.
license
4.
devices
5.
IBM Spectrum Protect for SAN
6.
Operations Center

Incorrect Answers:

C, D: The database (DB2), the Global Security Kit (GSKit) and IBM Java Runtime Environment (JRE) are automatically installed when you select the server component.

QUESTION 3

Which client function allows management of a set of related files on different file systems, that have the same backup, restore, and server policies?

- A. Common policy set

- B. Backup set
- C. Backup copy group
- D. Backup group

Correct Answer: A

Policy sets contain management classes (which contain copy groups) that determine the rules by which Data Protection for SQL Server backups are performed and managed. Define the policy set to the policy domain to which Data Protection for SQL Server backups belong. The policy set must be activated and only one policy set can be active in the policy domain.

Incorrect Answers:

C: A copy group controls how backup versions are generated, located, and expired.

QUESTION 4

How is the amount of client data backed up during the last 24 hours determined?

- A. run QUERY SUMMARY BEGIN= ? administrative command
- B. use the command line builder within the Operations Center and run Q BACKUP BEGIN=1
- C. look at the Activity pane the IBM Spectrum Protect Operations Center
- D. from the administrative command line run QUERY OCCUPANCY -ALL

Correct Answer: D

QUERY OCCUPANCY (Query client file spaces in storage pools)

Use this command to show where client file spaces are stored and how much space they occupy.

Incorrect Answers:

B: The query backup command displays a list of backup versions of your files that are stored on the IBM Spectrum Protect server, or that are inside a backup set from the server when the backupsetname option is specified.

QUESTION 5

Which option in the dsmserv.opt specifies the location of the active log directory?

- A. ACTIVELOGDIRECTORY
- B. ARCHFAILOVERLOGDIRECTORY

C. ACTLOGDIRECTORY

D. ARCHIVELOGDIRECTORY

Correct Answer: A

ACTIVELOGDIRECTORY The new directory for the location where the active log is stored. Use this option to change the location of the active log.
