QUESTION 1

Which three browsers are supported for use with CLM products? (Choose three.)

- A. Firefox
- B. Internet Explorer
- C. Chrome
- D. Safari
- E. Opera

Correct Answer: ABD

QUESTION 2

What are three good reasons for a project team to use Rational Software Architect Design Manager to assist in the process of reviewing and approving solution designs? (Choose three.)

- A. It allows developers and designers to each update the relevant sections of a model at given points in the project lifecycle and according to a defined schedule.
- B. It allows reviewers to annotate and make comments on any of the elements in a design model.
- C. It allows stakeholders to create links from a solution design to specific requirements.
- D. It allows a team of architects to work concurrently on a solution design by locking or reserving particular sections.
- E. It allows a team of reviewers and architects to have an open discussion displayed next to the solution designs with annotations over the document.

Correct Answer: BCE

QUESTION 3

What are three characteristics of an environment that should usually use a content caching proxy server? (Choose three.)

- A. high volumes of builds
- B. poor client performance
- C. poor build server performance
- D. poor WAN performance
- E. high volumes of version control operations

Correct Answer: ADE

QUESTION 4

A project team is using the Scrum process template process lifecycle that comes as a default process template with Rational Team Concert (RTC). The team is expanded to include a solution architect to the team, and the development process needs to be changed so that the architect can review the requirements prior to the commencement of sprint cycles. What should be done to achieve this using RTC and CLM? (Choose two.)

- A. modify the Scrum process template by extending the work item lifecycle to include a new "State" for architecture review
- B. modify the Scrum process template by adding a new "Work Area Category" to cover the steps done by the architect
- C. configure Rational Software Architect Design Manager to initiate a design review at the start of each sprint
- D. modify the Scrum process template by adding a new "Role" for architects
- E. modify the Scrum process template by the adding a new "Reviewer Type" to cover the reviews performed by the architect

Correct Answer: AD

QUESTION 5

When a defect is submitted from a test execution, the CLM solution performs which action automatically?

- A. generation of links to plan items
- B. assignment of ownership for the defect
- C. assignment of team for the defect
- D. assignment of severity for the defect

Correct Answer: A
