-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Workload analysis is a design-time activity that includes which four processes? (Choose four.)

- A. identifying the performance bottlenecks of the application
- B. identifying the workload to be simulated or emulated in the performance tests, in terms of number of actors or actor classes and actor profiles
- C. identifying the actors and actor characteristics to be simulated or emulated in the performance tests
- D. clarifying the objectives of performance testing and the use cases
- E. determining the performance measures and criteria
- F. identifying the quality of application architecture

Correct Answer: BCDE

QUESTION 2

What is the term for accurately defining the loading conditions under which the target test items must operate within their target configuration environment?

- A. test scheduling
- B. hardware sizing
- C. workload analysis
- D. threat modeling

Correct Answer: C

QUESTION 3

When should you use a synchronization point when conducting a performance test?

- A. to run multiple tests simultaneously
- B. to time the start and end of performance tests
- C. to enable you to coordinate the activities of a number of virtual users
- D. to work with multiple performance test tools

Correct Answer: C

QUESTION 4

What does the workload analysis document do?

- A. It is used to document the performance tests against the system under test to understand trends of the performance testing.
- B. It identifies the variables and defines their values used in the different performance tests to simulate or emulate the actor characteristics, users business functions (use cases), load, and volume.
- C. It helps you understand the system under test characteristics.
- D. It discusses how IBM Rational Performance Tester will be used among the testing group to performance test an application.

Correct Answer: B

QUESTION 5

What does a datapool provide?

- A. one variable for each virtual tester in a schedule
- B. one variable for each test schedule that is run
- C. one record containing one or more variables for each virtual tester in a schedule
- D. one record containing one or more variables for each test schedule that is run

Correct Answer: C
