Following Questions and Answers are all new published by IBM Official Exam Center

QUESTION 1

Workload analysis is a design-time activity that includes which four processes? (Choose four.)

A. identifying the performance bottlenecks of the application

B. identifying the workload to be simulated or emulated in the performance tests, in terms of number of actors or actor classes and actor profiles

C. identifying the actors and actor characteristics to be simulated or emulated in the performance tests

D. clarifying the objectives of performance testing and the use cases

E. determining the performance measures and criteria

F. identifying the quality of application architecture

Correct Answer: BCDE

QUESTION 2

Which four steps are required to import the response time breakdown from the production environment to troubleshoot performance? (Choose four.)

A. select an existing set of execution results in the Performance Test Runs view and right-click for Import Response Time Breakdown Data

B. enter the hostname to the Tivoli Monitoring for Composite Application Manager and the authentication information in the form of user ID andpassword

C. specify the time period to import the data by supplying the start date and time, and end date and time

D. select the data to import by clicking on Import Aggregated Statistics

E. select the policies or traps to import the data

F. specify the response time result data file

Correct Answer: ABCE

QUESTION 3

When should you use a synchronization point when conducting a performance test?

A. to run multiple tests simultaneously

B. to time the start and end of performance tests

C. to enable you to coordinate the activities of a number of virtual users

D. to work with multiple performance test tools

Correct Answer: C

QUESTION 4

What are three key elements of a workload? (Choose three.)

A. user attributes (types and characteristics)

B. transaction mix and frequency

C. test script creation

D. data security

E. test environment and configuration

Correct Answer: ABE

QUESTION 5

The Response Time Breakdown report shows a table for an aggregation of all instances of a selected page element. Which two layouts are available? (Choose two.)

A. simple layout

B. hierarchical layout

C. table layout

D. UML layout

Correct Answer: AD
