QUESTION 1

A solution developer is using the DataPower Security Wizard to configure an HTTP Input node. In the IBM Integration Explorer, the solution developer needs to merge new request and response rules into an

existing DataPower XML Firewall policy. When the developer does the merge a new policy is created. What can the developer conclude from this result?

A. The Policy Set binding is not configured.

B. The DataPower XML Filewall policy does not exist.

C. The DataPower existing XML Filewall settings have been altered.

D. The connection to the DataPower Security Wizard failed because SSL cert is invalid.

Correct Answer: C

QUESTION 2

A solution developer needs to provide identifiers for the components and resources in a broker environment. These identifiers are used in themqsideploycommand.

Which special character can the developer use in Windows and Linux for identifiers?

A. $

B. .(dot)

C. ~ (tilde)

D. \\'(apostrophe)

Correct Answer: A

QUESTION 3

A solution developer needs to configure the HTTP listener of an Integration Server on a Linux Server.

Which operating system privilege(s) does the developer need to modify Integration node properties and properties of integration node resources?

A. mqm

B. mqm and mqbrks

C. mqbrks

D. root user

Correct Answer: D

QUESTION 4

A solution developer needs to develop a generic message handler that is common to all applications and message flows. The message handler parses a complex file than contains healthcare records and extracts Patient Eligibility requests. The developer wants to make and deploy changes to the message handler without redeploying all the message flows.

How should the developer define the Integration Bus artifacts?

Define the message handler as:

A. a subflow in a library and define the message flows as services that reference the library.

B. a subflow in a library and define the message flows as applications that reference the library.

C. a subflow in a library and define the message flows as independent resources that reference the library.

D. an integration service and define the message flows as applications that reference the integration service.

Correct Answer: D

QUESTION 5

A solution developer is asked by a deployment team about options to deploy BAR files that provide just deployment capabilities.

Which option provides only deployment capabilities, and does not provide packaging capabilities?

A. Commands on AIX

B. Commands on Windows and Linux

C. IBM Integration web user interface

D. Integration API and IBM Integration Explorer

Correct Answer: C
