QUESTION 1

During testing of an SCA component, an integration developer uses the administrative console to select event points for monitoring using the Common Event Infrastructure (CEI) server.

Which service must be enabled to capture service component event details?

A. Diagnostic Trace service

B. Diagnostic Logging service

C. Component Event Monitoring service

D. Common Base Event Browser service

Correct Answer: D

QUESTION 2

Two integration developers are working on the same mediation module using WebSphere Integration Developer. The module code needs to be merged at the end of each day so that the developers start at the same completion level next day. Which of the following options is the correct way to achieve this with respect to the versioning support in WebSphere Integration Developer? The developers can:

A. continue working on their individual versions of the projects and user \\'compare projects\\' feature at the beginning of each day.

B. continue working on their individual versions of the projects and merge them using a source control tool at the end of each day.

C. maintain multiple versions of the projects in their respective workspaces and use the \\'merge projects\\' feature at the end of each day.

D. maintain multiple versions of the projects in their respective workspaces and use the \\'synchronize projects\\' feature at the end of each day.

Correct Answer: B

QUESTION 3

Interface requirements for a new project include allowing external client applications to create, retrieve or update customer records in a backend system. Which of the following export interface models BEST implement these requirements?

A. One interface with one operation and three inputs.

B. One interface with three operations and one input for each operation.

C. One interface with three operations and three inputs for each operation.

D. Three interfaces with one operation each and one input for each operation.

E. Three interfaces with three operations each and one input for each operation.
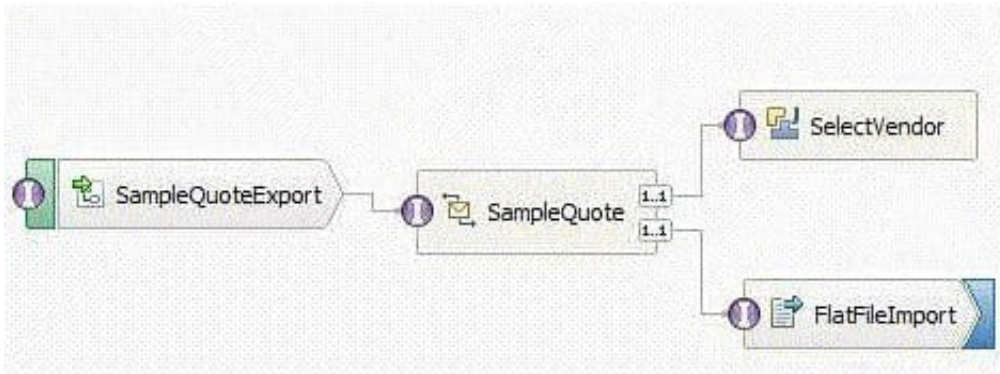

Correct Answer: BD

QUESTION 4

An integration developer is creating a test configuration using the integration test client (ITC). Which of the following statements are applicable to the test configuration?

A. Test configuration is used to control a unit test.

B. Test bucket can be customized for a specific test case.

C. Test bucket configuration is used to customize and control a component test.

D. The integration developer can create only one test bucket configuration.

E. The integration developer can save one open test configuration per test configuration.

Correct Answer: AC

QUESTION 5

Refer to the Exhibit.

The Life Sciences department of a company is developing a drug discovery solution in which a SelectVendor service (request-response) helps them choose between Vendor A or B to acquire drug samples. This service is called from a mediation flow using a Service Invoke primitive. The response is written to a flat file before returning to the client, invoking this mediation flow. The response must be received by the client in the same transaction. What should be the values of \\'Preferred Interaction Style\\' at the client invoking this mediation flow, and the \\'Invocation Style\\' of ServiceInvoke primitive within the flow?

A. Any, Any

B. Any, Sync

C. Synchronous, Async (with callback)

D. Asynchronous (with deferred response), Async (with callback)

Correct Answer: B
