**QUESTION 1**

What is true about a newly created user defined query in the IBM Tivoli Monitoring solution?

A. It can be used by many users.

B. It can only be used by the user who created it.

C. It can only be used by users in the same group as the query\\'s owner.

D. It can be used by any user who is permitted to either view or make changes to queries.

Correct Answer: D

**QUESTION 2**

What are two ways to select the top 20 rows for a given attribute? (Choose two.)

A. Use the Advanced button in the Query Editor to select the attribute to sort by, and then select the first 20 in the First/Last Functions.

B. In the Properties Overview window click on Set Advanced Filtering Options, click Enable First/Last Filter, select the attribute to sort by, click Descending, and then select the first 20 in the First/Last Option.

C. In the Properties Overview window click on the Query tab, click on Number of Rows to Return, and enter 20. In the Workspace View click on the attribute column to sort by the attribute. Save the workspace.

D. Use the Advanced button in the Query Editor to select the attribute to sort by and click Descending. In the Properties Overview window click on the Query tab, click on Number of Rows to Return, and enter 20.

E. In the Properties Overview window click on the Filter tab. Click the box under the attribute to select it. Click in a cell under the attribute and select the Sort By function and Descending. In the Properties Overview window click on the Query tab, click on Number of Rows to Return, and enter 20.

Correct Answer: AB
