### QUESTION 1

What do you during the subscription order capturing process in SAP S/4HANA Service: SOM?

- A. Monitor order status
- B. Configure rate plan and its services.
- C. Update order and contract status.
- D. Advise customer on service being offered.

Correct Answer: A

The correct answer is A. During the subscription order capturing process in SAP S/4HANA Service: SOM (Subscription Order Management), you would monitor the order status. This involves tracking the progress of the order, ensuring that it is being processed correctly, and identifying any issues that may arise. It is important to keep a close eye on the order status to ensure that the customer's needs are being met and that the subscription process runs smoothly.

Option B, configuring rate plan and its services, typically occurs before the order capturing process and involves setting up the pricing and services for the subscription. Option C, updating order and contract status, is related to monitoring the order status but involves making updates and changes as needed. Option D, advising the customer on the service being offered, would generally occur earlier in the subscription process during the sales or marketing stage.
