### QUESTION 1

Which elements can you specify with the SAP Web IDE for SAP HANA graphical editor for Core Data

Services data models?

Note: There are 3 correct answers to this question.

- A. Context
- B. Association
- C. Synonym
- D. Entities
- E. Procedure

Correct Answer: ABD

---

### QUESTION 2

You create a simple data model to store user information. The model contains two tables: One for the user information, the other for user address details. The user can only have one address. You also need a view to show the complete information of the user including the address. Which actions do you perform if you use CDS artifacts only?

- A. Create two entities for the user and address. Extend the user entity with address columns. Create a view named User Details using select on the user entity.
- B. Create two entities for the user and address. Create a User Details calculation view and join the user and address information.
- C. Create two entities for the user and address. Create an association in the user entity to the address O entity. Define a User Details view using select on the address entity and using the association to read the user information.
- D. Create two entities for the user and address. Create an association in the user entity to the address O entity. Define a User Details view using select on the user entity and using the association to read the address information.

Correct Answer: D

---

### QUESTION 3

A Node.js module is executed for the first time in SAP HANA extended application services, advanced model (XS advanced). Which of the following activities are performed automatically? There are 2 correct answers to this question.

- A. A new SAP HANA Deployment Infrastructure (HDI) container is created.
- B. A new service is executed on the application server.

- C. The required modules are downloaded based on module dependencies.
- D. The source code is compiled to create an executable binary file.

Correct Answer: CD

---

#### QUESTION 4

What are the main SAP HANA engines responsible for executing calculation views? There are 3 correct answers to this question.

- A. XS Engine
- B. Join Engine
- C. OLAP Engine
- D. Java Engine
- E. Calculation Engine

Correct Answer: BCE

---

#### QUESTION 5

What are the disadvantages when deploying Dynamic SQL? There are 2 correct answers to this question.

- A. No possibility to use SQL Script variables
- B. No possibility to bind the result to a SQL Script variable
- C. Additional SQL execution privileges are required
- D. Limited opportunities for optimization

Correct Answer: BD
