QUESTION 1

Which of the following allows data replication?

- A. SAP HANA smart data access
- B. SAP HANA streaming analytics
- C. SAP HANA smart data integration
- D. SAP HANA smart data quality

Correct Answer: C

QUESTION 2

Which of the following data sources can you include in a graphical calculation view?

Note: There are 2 correct answers to this question.

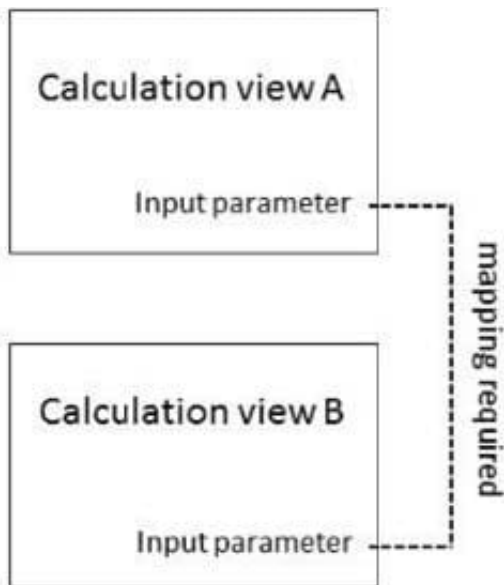

- A. SQL view
- B. Table function
- C. Scalar function
- D. Procedure

Correct Answer: AB

QUESTION 3

You want to map an input parameter of the calculation view A to the input parameter of calculation view B using the parameter mapping feature in the calculation view editor. However, the input parameter of the calculation view B is not proposed to you as a source parameter.

What might be the reason for this?

- A. You selected the wrong parameter mapping TYPE.
- B. The names of the input parameters do not match.
- C. You already mapped the input parameters in another calculation view.
- D. Your source calculation view is of the type SQL Access Only.

Correct Answer: C

QUESTION 4

Which is the correct syntax when you refer to an input parameter in a calculation view expression?

- A. \$\$Choose_Country\$\$
- B. :Choose_Country
- C. ..Choose_Country"
- D. @Choose_Country

Correct Answer: A

QUESTION 5

You are building a new calculation view B that uses calculation view A as a data source. In the Semantics node of calculation view A, you define a mask for the first 10 digits of a 15 digit Account Number. When you preview calculation view B, the Account Number is not masked.

Why do you see the Account Number unmasked?

- A. The masking is based on the column of a row table.

- B. You did not define masking in calculation view B.
- C. The UNMASKED privilege for calculation view A has been granted.
- D. The Account Number is based on the Integer datatype.

Correct Answer: C
